Web Application Developer Internship

Are you interested in a rewarding and challenging opportunity? Join the U.S. Small Business Administration, Commercial Loan Servicing Center Internship Team!

The Little Rock Commercial Loan Service Center is looking for college students or recent graduates, majoring in Computer Programming and Application Development, to assist in upcoming web application development projects. This non paid internship offers a great opportunity for students to gain firsthand experience in real world application development. The Agency is seeking Junior and Senior Level students who have basic skills, experience and knowledge working with any of the following technologies.

Preferred Skills:

- HTML5
- CSS
- Bootstrap
- JQuery
- JavaScript
- Adobe ColdFusion
- Microsoft ASP.NET
- Transact SQL
- Microsoft Visual Studio Code and Microsoft Offices Products (Word, Excel, Outlook)

Required Skills:

- Code documentation and technical writing is required.

Time management skills, working in a team environment, completing tasks, assignments and following functionality specifications and guidelines are required as well as the willingness to be challenged and learn new technical skills. The intern(s) will assist and work directly with the Center’s Supervisory Information Technology Systems Specialist. The Supervisor will determine and assign projects and tasks as needed. Ideally, the student(s) can devote 8 to 12 hours per week. This a 6 to 12 month internship.

Agency Requirements:

- Potential candidate must pass background check.
